Table of Contents

Fundamentals of Java Programming for Information Systems

Jeremy D. Ezell

Prospect Press, January 2024
Copyright 2025

Preface vii

PART 1: JAVA LANGUAGE BASICS 1

Chapter 0: Basics of Java Programming 2
What You Will Learn in This Chapter 2
Opening Scenario 2
0.1 Your First Java Program 3
0.2 Data Types and Variables 9
0.3 Printing to Console Output 14
0.4 Capturing User Input from the Console 17
Summary 21
Practice Problems 21

Chapter 1: Putting Data to Work with Operators 25
What You Will Learn in This Chapter 25
Opening Scenario 25
1.1 Understanding Operators 26
1.2 Arithmetic Operators 28
1.3 Operators That Compare Values 33
1.4 Operator Precedence 38
Summary 41
Practice Problems 41

Chapter 2: Using Object-Oriented Java 45
What You Will Learn in This Chapter 45
Opening Scenario 45
2.1 Understanding Java's Object-Oriented Nature 46
2.2 Class Constructors and Instance Objects 48
2.3 Instance and Static Data Fields of Classes 53
2.4 Instance and Static Methods of a Class 57
2.5 Understanding Complex Variables 60
2.6 Using Some Example Classes from the Java Library 62
Summary 65
Practice Problems 65

Chapter 3: Strings and Text Formatting 68
What You Will Learn in This Chapter 68
Opening Scenario 68
3.1 "Understanding the String Class" 69

3.2 Working with Index Notation and Substrings 74
3.3 Other Useful String Methods 79
3.4 Formatting Strings for Display 83
Summary 90
Practice Problems 91

Chapter 4: Decision Logic and Code Flow 95
What You Will Learn in This Chapter 95
Opening Scenario 95
4.1 Evaluation Using the if Statement 96
4.2 Expanding the if Statement 105
4.3 switch Statement 110
Summary 115
Practice Problems 116

Chapter 5: Loops, Loops, Loops, Loops . . . 122
What You Will Learn in This Chapter 122
Opening Scenario 122
5.1 Machines Love Loops 123
5.2 for Loops 124
5.3 Nesting for Loops 134
5.4 while Loops 139
5.5 do…while Loops 143
Summary 147
Practice Problems 148

Chapter 6: Methods 155
What You Will Learn in This Chapter 155
Opening Scenario 155
6.1 Why Are Methods Useful? 156
6.2 Method Definition: The Structure of Methods 158
6.3 Method Invocation: How to Use Methods 164
6.4 Method Overloading: Increasing Method Flexibility 172
Summary 174
Practice Problems 175

Chapter 7: Working with Data in Arrays 181
What You Will Learn in This Chapter 181
Opening Scenario 181
7.1 Arrays versus Primitive Data-Type Variables 182
7.2 One-Dimensional Arrays 185
7.3 Two-Dimensional Arrays 193
7.4 Advanced Array Concepts 202
Summary 212
Practice Problems 213

PART 2: INTERMEDIATE JAVA CONCEPTS 219

Chapter 8: Object-Oriented Programming with Java Classes 220
What You Will Learn in This Chapter 220
Opening Scenario 220

8.1 Classes and Object-Oriented Programming 221
8.2 Classes and Instance Objects 225
8.3 “Test Driving” the User-Defined Class Person 229
8.4 Class Constructor Methods 232
8.5 Defining Class Member Methods 235
8.6 Using References to Instance Objects 241
8.7 Using Complex-Type Data Fields in Your Class 246
Summary 250
Practice Problems 250

Chapter 9: Class Inheritance and Polymorphism 255
What You Will Learn in This Chapter 255
Opening Scenario 255
9.1 Class Inheritance: Basics and Benefits 256
9.2 Defining the Subclass 260
9.3 Method Overriding 268
9.4 Understanding Polymorphism 273
Summary 279
Practice Problems 280

Chapter 10: Exceptions, Good Practice, and Professional Java 285
What You Will Learn in This Chapter 285
Opening Scenario 285
10.1 Understanding Exception Handling in Java 286
10.2 Java Development Good Practices 297
Summary 306
Practice Problems 307

Chapter 11: Creating Java User Interfaces with JavaFX 312
What You Will Learn in This Chapter 312
Opening Scenario 312
11.1 Overview of GUI Frameworks in Java 313
11.2 Building a Basic JavaFX Application 316
11.3 Understanding Event Handling in JavaFX 327
Summary 336
Practice Problems 336

Chapter 12: Java Applications and Database Integration 342
What You Will Learn in This Chapter 342
Opening Scenario 342
12.1 Database Basics: ERDs, Database Tables, and SQL 343
12.2 Database Integration with Console-Based Java Applications 354
Summary 373
Practice Problems 374

Appendix A: Java Development Kit, Java IDEs, Oracle DB Setup, Debugging, and jShell 379
How to Use This Appendix 379
Installing the Java Development Kit 379
A.1 Java-Integrated
Development Environments 379
A.2 Installing Oracle Database Express Edition 21c 386

A.3 Executing SQL Commands in NetBeans 391
A.4 Enabling Database Connections through Your Java Code 392
A.5 Running Commands in SQLPlus 394
A.6 Interactive Learning Using jShell 395
A.7 Creating a JavaFX Project 398

Appendix B: Operator Precedence and Working with Java Expressions 399
How to Use This Appendix 399
B.1 Java Operator Precedence 399
B.2 Examples of Java Expressions 400

Appendix C: Working with ASCII Character Codes 403
How to Use This Appendix 403
C.1 ASCII Character Codes 403
C.2 Working with char and String Data Types 404

The six companion chapters are included in the eTextbook only. For those using the paperback version, PDFs of the companion chapters can be freely downloaded from the title's website at https://www.prospectpressvt.com/textbooks/ezell-java. Scroll to the red horizontal menu bar, then click on "Student Resources."

Companion Chapter 1: Creating Java User Interfaces with Swing 407
What You Will Learn in This Chapter 407
Opening Scenario 407
CC1.1 Overview of GUI Frameworks in Java 408
CC1.2 Building a Basic Swing GUI Java Application 411
CC1.3 Understanding Event Handling in Swing 427
Summary 438
Practice Problems 438

Companion Chapter 2: File I/O in Java 443
What You Will Learn in This Chapter 443
Opening Scenario 443
CC2.1 Basics of File I/O in Java 444
CC2.2 Working with Binary File Data 453
Summary 463
Practice Problems 463

Companion Chapter 3: Recursion 468
What You Will Learn in This Chapter 468
Opening Scenario 468
CC3.1 Understanding Recursion 469
CC3.2 Practical Business Uses of Recursion in Java 480
Summary 487
Practice Problems 487

Companion Chapter 4: Abstract Classes, Interfaces, and Generics 489
What You Will Learn in This Chapter 489
Opening Scenario 489
CC4.1 Abstract and Concrete Classes 490
CC4.2 Interface Classes 496

CC4.3 Generic Interfaces, Classes, and Methods 503
Summary 511
Practice Problems 511

Companion Chapter 5: Java Collections Framework 515
What You Will Learn in This Chapter 515
Opening Scenario 515
CC5.1 Classes of the Java Collections Framework 516
CC5.2 Stacks, Queues, Sets, and Iterators 525
CC5.3 Using the Map Classes of the Collections Framework 533
CC5.4 Additional Business Applications of Some Java Collections Framework Classes 537
Summary 541
Practice Problems 541

Companion Chapter 6: Multithreading and Parallel Programming 547
What You Will Learn in This Chapter 547
Opening Scenario 547
CC6.1 Concurrency in Java Using Thread and Runnable Classes 548
CC6.2 Exploring the Concurrency API in Java 561
Summary 564
Practice Problems 564
